Description
Every time I add a new item in the tracker I get this type of error message shown:
(I didn't see it yesterday):

❝

> *Indexing failed while processing XXX (type YYY) with the error "normalizer sortable not found for field sort*

In this specific case, the exact messages were:

Error Indexing failed while processing "21457" (type activity) with the error "normalizer
[sortable] not found for field [sort]" × Error Indexing failed while processing "7138" (type
trackeritem) with the error "normalizer [sortable] not found for field [sort]"

Comments

Marc Laporte 23 Jul 19 00:34 GMT-0000

I recently (In the last 48 hours), I activated "Unified Index: fall back if Elasticsearch is unaccessible"

I don't know of other changes to the config

Marc Laporte 23 Jul 19 00:37 GMT-0000

I just turned off this preference.

Good now?

Xavier de Pedro 23 Jul 19 06:41 GMT-0000

Hi Marc. Thanks for reporting.
Remember to log your changes (in general) at the gardeners blog, please:
https://tiki.org/blog2-Tiki-Website-Gardeners-Blog

We are less fast/efficient doing so in the short term, but more resilient (and fast progressing) in the mid and long term, you know!

And thanks again for your time and eneegy/resources invested to keep *.t.o infraestructured fine tuned and as optimal as possible. We all benefit from that. 😃
Cheers
