Description
When Tiki is not completely set up and composer (vendor_bundled libs) not ready, Tiki shows only raw plain-text message when you access pages like tiki-admin.php or tiki-listpages.php

It shows only:
"Your Tiki is not completely installed because Composer has not been run to fetch package dependencies. You need to run 'sh setup.sh' from the command line. See https://doc.tiki.org/Composer for details."

It would be better if it used default Tiki UI / theme some HTML + CSS UI displaying the message in a nicer way.

Easy to solve?
10 easy

Priority
50

luciash d' being [] I agree it should be nicer but if dependencies are not there, Bootstrap is not there, and thus, "default Tiki UI / theme" is not possible.

luciash d' being [] 13 Nov 21 19:17 GMT-0000
True. Thanks for pointing that out Marc Laporte!
