Description

For some reason, GanttChart changes in StartIsMilestone and EndIsMilestone don't get saved across editions.

What needs to be changed? Profile GanttChart defines them so far as checkboxesm but maybe it's not the right field type. Should the param value stored in Tiki be yes, y, or true or something else? Or maybe the issue is somewhere else?

Help is appreciated to get this (currently broken) feature up & running by default when applying the demo profile.

Thanks!

You can reproduce this issue by means of applying the GanttChart profile.

There are several problems causing this. In the example wiki code

```
startIsMilestone=="trackerganttStartIsMilestone" endIsMilestone=="trackerganttEndIsMilestone"
```

should be

```
startIsMilestone="trackerganttStartIsMilestone" endIsMilestone="trackerganttEndIsMilestone"
```

Secondly in `wikiplugin_ganttchart.php` where it says

```
if ($startIsMilestone == $fieldItem['permName'] && $fieldItem['value'] == 'y') {  
    $fieldStartIsMilestone = true; if ($endIsMilestone == $fieldItem['permName'] && $fieldItem['value']  
    == 'y') { $fieldEndIsMilestone = true; } }
```

should be

```
if ($startIsMilestone == $fieldItem['permName'] && $fieldItem['value'] == 1) {  
    $fieldStartIsMilestone = true; } if ($endIsMilestone == $fieldItem['permName'] &&  
    $fieldItem['value'] == 1) { $fieldEndIsMilestone = true; }
```

The values are then saved back to the database as true/false instead of y/(blank) (or anything other than

y really)

in the same php file, in the save function after

```
if ($key === 'effort') { $value = getTimeToMilliseconds($field); }
```

add:

```
if ($key === 'startIsMilestone') { if ($field == 'true') { $value = 1; } else { $value = 0; } } if ($key === 'endIsMilestone') { if ($field == 'true') { $value = 1; } else { $value = 0; } }
```

After these changes milestones work for me. I don't have code access so someone will have to apply these changes.

"I don't have code access so someone will have to apply these changes."

Let's fix that 😊

What is your SourceForge username?

Thanks!

Xavier de Pedro 27 Oct 19 10:43 GMT-0000

Hey, thanks! (I hadn't noticed the reply, busy elsewhere this last week), and thanksnfor your reply, Marc! Wohoooo, this smells like fixes to help progessing to makenthis feature awesome as it deserves! 😊
