### Description

Currently Forum Sections can be created when a forum is being created/edited.

(described here <https://tiki.org/forumthread72458-Editing-or-removing-Forum-sections> )

However, once created, Forum Sections cannot be easily edited or deleted. There is a workaround described in the link above, but the aim of this ticket is to improve the management of Forum Sections, so that they can be

- easily edited
- easily deleted
- sortable, without having to resort to numbers or spaces in front of them

This has been discussed with Marc Laporte and work should begin shortly.

Update: this functionality has been implemented. Once some validation issues with the test site have been resolved this ticket can be closed.
