Description
 Multiple dependencies are saving back to database (from chart) without commas between
 dependencies. When reloaded of course the dependencies didn't work. Added a comma before save
 back to database fixed the problem.

Solution
 In tiki/lib/wiki-plugins/wikiplugin_ganttchart.php line 616 (or so) change:

 ```
 $dependsIds .= $index;
 ```

 to

 ```
 $dependsIds .= ($index == '') ? $index : ','.$index;
 ```
