Description

Had trouble turning Action buttons of in Bloglist.

Tested themes fivealivelite and lighty, the buttons didnt disappear.

Tried to reproduce the error in demo version on server didnt work.

Turned Standard Bootstrap theme on my server on. Option showIcons worked as it should.

on this page/version it seems to work either, so it seems solved for fivealife theme:

Removed the deprecated Rating field

 luciash d' being  Monday 23 September, 2019

Removed the obsolete useless "235 Rating (deprecated) Stars (system - ... [<more>](#)

jqDoubleScroll enabled

 **luciash d' being**  Thursday 06 June, 2019

Hi, I have enabled the new 20.x feature on this site. [<more>](#)

Preference feature jquery validation disabled (Preference name: feature_jquery_validation)

 **luciash d' being**  Saturday 17 November, 2018

Due to [the bug](#) in *feature_jquery_validation* I have disabled this ... [<more>](#)

No big trouble just annoying, and took some time to figure out the reason.
And didnt find a solution yet to turn off the buttons using lighty/fivealive theme)(hintappreciated)

THX Tobi

In principle, behavior like button functionality should be the same from one theme to another. Tiki themes are intended to only be visual skins and not add or change site features, etc. I get a "Lost Tiki database connection" error at your show instance just

now, but will check again later.

slowtobi 11 Nov 19 07:59 GMT-0000

Didnt get the tikishow instance to work. It just said to "use setup.sh", and no access to tiki-index.php. So couldnt make a demo.

tomake it clearer, i attached 2 screenshots of the same page to the issue, just switching the theme, without changing the page, its reproducible on my local host 19.1.

luciash d' being  13 Nov 19 10:43 GMT-0000

The show instance seems to be alive now.
