Related-to

- ● No TAKE button shown once set a webmail IMAP account. Clear docs and profile update needed for Groupmail

Description

Webmail inbox module is not shown any more in 20.x and 21.x, and no clear indication what replaces it, if any (not in the documentation pages for [Groupmail](#) nor its profile [Groupmail_20](#))

Maybe that module needs to be removed from the tiki code base if webmail and cypht plugin is meant to replace it somehow? (unclear how, yet, to me)

Do you think it's worth putting back?
