Description

Hi Tiki community,

I want to validate if from Tiki 18 the displayed number of a TOC is by default always showing the first Level of a title even if we specify only the second level

Table of contents

- La fonction « recherche » dans le moteur de recherche de Foncierpédia

La fonction « recherche » dans le moteur de recherche de Foncierpédia

We had in Tiki 15 :

TABLE DES MATIÈRES

1. La fonction « recherche » dans le moteur de recherche de Foncierpédia
1. Les mots clés à éviter

Now we have in Tiki18.4

TABLE DES MATIÈRES

- 1.1. La fonction « recherche » dans le moteur de recherche de Foncierpédia
- 1.2. Les mots clés à éviter

Part of the code where it seems to make the difference in parserlib.php file : V15

```
// Update last_hdr info for the next header
```

```
$last_hdr = $hdr_structure$nb_hdrs;
```

```
$nb_last_hdr = count($last_hdr);
```

```
$current_title_real_num = implode('. ', $hdr_structure$nb_hdrs).'.';
```

```

// Update the current title number to hide all parents levels numbers if the parent has no
autonumbering
$hideall = false;
for ( $j = $hdrlevel ; $j > 0 ; $j-- ) {

if ( $hideall
empty($show_title_level$j) ) {
unset($hdr_structure$nb_hdrs$j - 1);
$hideall = true;
}
}

// Store the title number to use only if it has to be shown (if the '#' char is used)

$current_title_num = $show_title_level$hdrlevel ? implode('.', $hdr_structure$nb_hdrs).'.': '';

$nb_hdrs++;

In v18

// Update last_hdr info for the next header
$last_hdr = $hdr_structure$nb_hdrs;
$nb_last_hdr = count($last_hdr);

if (is_array($last_hdr)) {
$current_title_real_num = implode('.', $last_hdr) . '.';
} else {
$current_title_real_num = $last_hdr . '.';
}

// Update the current title number to hide all parents levels numbers if the parent has no
autonumbering
$hideall = false;
for ($j = $hdrlevel; $j > 0; $j--) {
if ($hideall

empty($show_title_level$j)) {
unset($hdr_structure$j - 1);
$hideall = true;
}
}

// Store the title number to use only if it has to be shown (if the '#' char is used)
$current_title_num = "";
if $hdrlevel) && isset($hdr_structure$nb_hdrs" class="wiki wikinew text-danger tips
isset">$show_title_level$hdrlevel) && isset($hdr_structure$nb_hdrs {
$current_title_num = $show_title_level$hdrlevel ? implode('.', $hdr_structure$nb_hdrs).'.': '';

}

$nb_hdrs++;

```
