Description

If you use the "add page" on the structure navbar (on a page that's in a structure), pick the language if necessary, then save the new page, two contradictory feedback messages appear, one saying "TikiLib::`create_page`: Cannot create page "Your New Page Name", it already exists.)" the other saying "Page *Your New Page Name* saved (version 1)."

The page seems to be save ok though.

! Error

TikiLib::create_page: Cannot create page "Tracker Field Rules", it already exists.)

✓ Success

Page Tracker Field Rules saved (version 1).

(I have a screen shot but can't insert it into here from the toolbar - another bug 🐛 - manually added)

Solution

Seems to have fixed itself?

Confirmed !

It works fine apart from the error message 😞
