Related-to

- ✖ index.php in the storage directory folder shouldn't be reported as an issue

Description

```
[root@ip-xxxxx html]# php console.php files:batchupload 5 --confirm <feedback>feedback:
Image was reduced: %s x %s -> %s x %s </feedback>
```

- HTML feedback is returned when using the console.php: It should be returned without tag.
- Un-needed or malformed feedback was returned: If no reduction it should return nothing or something like "Images where upload at original size".
- Expected message is missing: Should return something like "n files were successfully uploaded" (can be improved with the files, path and galleryId ?)

Is it returned only when all files are images or even if files are PDF (message is not relevant and erroneous)

- HTML feedback is returned also for tracker:import

<feedback>feedback: 9 tracker(s) item(s) updated </feedback>
