- ✖ Add Conditional Actions for Tracker Fields

Description

I tested on fresh new 21.x install but no rules appear. I enabled VueJS and the Tracker Rules feature as instructed on <http://doc.tiki.org/Tracker-Field-Rules>

In Chrome Google console I just get:

```
Failed to load resource: the server responded with a status of 404 (Not Found)
/tiki21x/temp/public/vue_TrackerRules.js:1
```

Same result on dev.tiki.org 😞

The screenshot shows the Tiki Wiki CMS Groupware interface. A modal window titled "Edit Checkbox" is open, displaying a list of tabs: General, Options for Checkbox, Validation, Rules, Permissions, and Advanced. The "General" tab is selected. Below the tabs are "Close" and "Save" buttons. In the background, a "System Menu" is visible on the left, and a "Mandatory" table is partially visible on the right. At the bottom, a "Show PHP error messages" button is present, and a list of four error messages is displayed:

- ERROR (E_WARNING): array_map(): Argument #2 should be an array
At line 80 in lib/smarty_tiki/function.menu.php
- ERROR (E_WARNING): array_filter() expects parameter 1 to be array, null given
At line 82 in lib/smarty_tiki/function.menu.php
- ERROR (E_WARNING): array_values() expects parameter 1 to be array, null given
At line 82 in lib/smarty_tiki/function.menu.php
- NOTICE (E_NOTICE): Undefined variable: target
At line 220 in lib/smarty_tiki/function.button.php

@Jonny Bradley yay, it works now!

Jonny Bradley 27 Feb 20 10:42 GMT-0000

Wow yay! Thanks for the feedback ?
