Description

Importing MS Visio files (.vsd) in PluginDiagram fails with `mxscript is not defined` while the same process succeeds in <https://draw.io> directly (even if both report to be using same draw.io version 12.7.9)

Something is missing to be mapped properly in ovr integration of draw.io library?

First time PluginDiagram reports:

Error mxscript is not defined

And second time you try it says:

Error Service unavailable or blocked

You can reproduce also with some sample vsd found in internet:

<http://file.fyicenter.com/b/sample.vsd>
