Description
    On a site with image galleries, there is a button in page tiki-galleries.php which claims *Migrate Images to File Gallery*

    When I click on it, a new File gallery is created and named *Migrated Image Galleries* (that is perfect!)
    For each image gallery, a file gallery with the same name as the image gallery is created as a child of *Migrated Image Galleries* (still perfect!)

    But no images are actually migrated to these new file galleries. The new file galleries are empty and the old image galleries are still there.

    Using the command line version gives the same lack of result:

    php console.php gallery:migrate All files migrated! feedback: L'image a été réduite : %s x %s -> %s x %s error: Duplicate file found as `Nouveau Fichier`. Upload rejected. error: Duplicate file found as `Beatrice1.jpeg`. Upload rejected. error: Duplicate file found as `kitty.jpg`. Upload rejected. error: Duplicate file found as `160x55_INESSStccn.jpg`. Upload rejected.

    But nothing was actually migrated.

    Files are stored on the file system, in case that makes a difference.

This prevents people from getting rid of deprecated *image galleries* feature.

See issue reproduced on: http://jyhem-9952-7324.show2.tikiwiki.org/

- Log in as admin
- Go to http://jyhem-9952-7324.show2.tikiwiki.org/tiki-galleries.php and click on *Migrate Images to File Gallery*.
- See a new file gallery showed up in http://jyhem-9952-7324.show2.tikiwiki.org/tiki-list_file_gallery.php with sub-galleries with proper names. The new file galleries are empty instead of containing the migrated images.

This also creates the file galeries without migrating the files:

root@seed22:/var/www/jyhem-9952-7324# php console.php gallery:migrate Undefined index: show_filename on line 175 of /var/www/jyhem-9952-7324/lib/filegals/filegallib.php Undefined index: show_filename on line 177 of /var/www/jyhem-9952-7324/lib/filegals/filegallib.php Undefined offset: 31 on line 737 of /var/www/jyhem-9952-7324/lib/metadata/datatypes/exif.php Undefined index: show_filename on line 175 of /var/www/jyhem-9952-7324/lib/filegals/filegallib.php Undefined index: show_filename on line 177 of /var/www/jyhem-9952-7324/lib/filegals/filegallib.php Undefined index: show_filename on line 175 of /var/www/jyhem-9952-7324/lib/filegals/filegallib.php Undefined index: show_filename on line 177 of /var/www/jyhem-9952-7324/lib/filegals/filegallib.php Undefined offset: 31 on line 737 of /var/www/jyhem-9952-7324/lib/metadata/datatypes/exif.php All files migrated!

Solution

That was an issue in `lib/core/Tiki/FileGallery/SaveHandler.php`
Fixed in 25f639a..844ebf4
