-  Page counter is completely functionless ?!

Description

No matter how often I visit the three blogs in my installation of 18.5, and no matter whether I do that as registered user, as admin or as anonymous and no matter how many blog entries I click:

All three visits counters are stuck at zero!

I could not find any bugs.

Page view counts require some settings enabled to increment whenever there is a page hit.

Page hits are recorded only when *Stats* feature is enabled.

If you require page hits from an admin user recorded, you should have *Count admin pageviews* enabled.

You will find these preference options in `/tiki-admin.php?page=stats`

Nat Okpe 24 Feb 22 10:44 GMT-0000

Also note that this settings are disabled by default.
