Description

The module multilike can be used to like or unlike a page, an article, an item, etc.

This is pretty neat to have a "Was this helpful" feature:

<https://medium.com/@GaryHarrower/user-feedback-was-this-page-helpful-39174efa9e93>

<https://www.flippercode.com/was-this-helpful/>

For anonymous it says you need to enable the permission "tiki_p_post_comments" but even with this permission `lib/core/Services/Relation/Controller.php` failed to validate as sources are not passed to the service if you are anonymous.

Line 103

```
// ensure the target, source, and relation info are passed to the service if (! $target_type || !  
$target_id || ! $source_type || ! $source_id || ! $relation_prefix) { throw new  
Services_Exception(tr('Invalid input'), 400); }
```

It would be nice to be able to use Multilike for anonymous.
