Description
We now need to fiddle in the templates to remove the print icon. In many cases, a print option is not useful.

Need both a tiki_p style permission and a feature_print style feature for this. Need to document the actual names we used, too.

One tiki-wide setting to deactivate all printable pages all links to these pages (with the little printer icon).

This will also be useful for [http://mobile.tikiwiki.org/](http://mobile.tikiwiki.org/) Let's try to do before 1.9.1

obs: waiting for cvs to unlock to commit
Solution
- Add a perm (and a feature?)
- respect that in templates

Done for 1.9.3 for wiki pages
Done for 1.9.4 articles

Importance
8
