Description

In line 520, lib/prefs/feature.php contains text (a hint) that cannot be translated into any language, because it doesn't call tra():

|||||||

```
'feature_contact' => [ 'name' => tra('Contact us'), 'description' => tra('A basic contact form a visitor can use to contact the site admin'), 'hint' => 'You can use Trackers to create custom Contact Us forms.', 'help' => 'Contact+us', 'type' => 'flag', 'default' => 'n', 'dependencies' => [ 'feature_messages', 'sender_email', ], 'tags' => ['basic'], 'admin' => 'general', 'view' => 'tiki-contact.php', ],
```

Comments

hman 22 Jul 20 08:24 GMT-0000

Another missing tra() in feature.php, feature_dummy, line 2769:

|||||||

'default' => 'This is the default value of this preference.',

hman 22 Jul 20 21:12 GMT-0000

And one in /lib/prefs/global.php:

|||||||

'urlIndexBrowserTitle' => ['name' => tra('Homepage Browser title'), 'description' => tra('Customize Browser title for the custom homepage'), 'type' => 'text', 'size' => 50, 'default' => 'Homepage', 'tags' => ['basic'], 'dependencies' => ['useUrlIndex',],],

The default should be processed with tra() because in some languages it might not be "Homepage".

Rodriguez Nyiringabo 07 Jan 22 12:28 GMT-0000

Problem fixed in tiki 24.x and merge request aprouved and merged
(https://gitlab.com/tikiwiki/tiki/-/merge_requests/1171).

Rodriguez Nyiringabo 07 Jan 22 12:36 GMT-0000

As the the problem was fixed in tiki 24.x and the merge request approuved and merged, to have the problem fixed in tiki 23.x, 21.x and 18.x, the next next step step consist of backport the commit in

23.x, 21.x and then 18.x, I will do it as soon as I can.
