Description

(or, alternatively, wrong user input method) The admin UI for the facet feature describes, that the user shall enter a comma-separated list of categories, yet a multiselection window is presented.

Interestingly, in `/lib/prefs/category`, where this help string comes from, is text input specified ?! If that would be presented, the text would be right, but somehow it is not...

```
'category_custom_facets' => [  
    'name' => tr('Generate custom facets from categories'),  
    'description' => tr('Comma-separated list of category IDs.'),  
    'type' => 'text',  
    'size' => 15,  
    'filter' => 'int',  
    'separator' => ',',  
    'default' => '',  
    'profile_reference' => 'category',  
],
```
