Description

When you create a survey, and add questions of the type "Rate (1 to 5)" (or 1 to 10), when you take the survey, all you get is the text of the question, and (if applicable) the red asterisk indicating mandatory answers) but underneath that not the expected either 5 or 10 radio buttons or a 1 or 2 digit numeric input field, but only the text "1 0" (one space zero, in both cases)! Nothing can be entered at all...

Also, there is a completely empty blue info box above the survey...

See the screenshot attached.

Since survey is such an old feature, I guess the functionality was at one point in time lost with the coming of a new version...

I could track this one (at least partially) down: Rate (1-5) AND (1-10) are "allergic" to being given an optional parameter! If you leave it out, they work, if you give one (it makes no difference what you enter) they only show one space zero...
