Description

The help for the survey features says this about option "Wiki textarea":

"Options are: rows,columns,toolbars.

Example: 10,60,n (toolbar can be "y", "n" or "c" for comments toolbar)"

Actually it's not rows and columns, but height and width. No matter how small you define it, user can enter text (virtually) limitless.

And the option c for comments toolbar is without any effect that I could notice?
