### Related-to

- Sending a message from userA through the userB's homepage doesn't keep a record at "Sent Messages" from userA

### Description

All inter-user message that I created via "My Account" -> "Messages" --> "Compose" are stored in my "Sent Messages".

However, if I pick a user's name from the list of Online Users or from the list of contributor to a wiki page, and from the "User Information" screen pick the "Send Me A Message" tab, any message sent from that screen is NOT stored in my "Sent Messages".

This is difference in behaviour seems unnecessary, particularly for our novice users.

Is this behaviour controlled by a configuration option we've incorrectly set, or is a bug the cause of this UX issue?

Thanks,

Martin

Apologies, this is probably a duplicate of item 2888 which I didn't find yesterday when searching before adding my report because of a typo in the title of 2888 (seding not sending).

luciash d' being 06 Aug 20 09:20 GMT-0000

Thanks, corrected the typo.
