### Description

The user ban system has a help text that suggests a feature, that seemingly does not (not yet?) exist: Exporting rules... see comment. this has cleared up. I leave this text only as an explanation why I originally opened this as a feature request

"section names are splitted by pipes (vertical bars). To see an example and use it as template, add one rule by hand, and export it as csv"

There is an import feature, but no export feature... Could also be handy for admins who want to extend bans to more than one Tiki, if they arent connected by InterTiki (dunno whether InterTiki cares about bans at all).

I tried whether the export feature would only come up once at least one rule exists, but no, no export. Existing rule can be edited or deleted, not exported.

Thanks  
hman

I now wanted to delete the test rule that I do not need anymore. There are two delete functions: One big X on yellow ground next to the title of the rule. That does nothing (except reloading the page)! No error message, no deletion. And now I saw an export at the very top of the page. I don't know if it was there before, but now I see it. And it does export to CSV.

The deletion from the wrench icon works. Okay, so there is an export. But a broken delete button...
