### Description

Four of the plugins in 18.7 cannot be de-activated. Simply, because clearing the checkbox "activate" is just ignored! How come? If there would be a dependency, an alert box would be more appropriate IMHO.

The non-de-activateable are

- quote
- split
- tabs
- toc

cf note that toc cannot even be used, because it in itself has a dependency that is not met (structures). I would consider this a bug. If you clear the checkboxes and save, you do not event get a confirmation that they have been deactivated, and consequently upon a reload those checkboxes are magically checked again...
