Description
I know Tiki Mobile is deprecated, but IMHO as long as it is still there it should at least be configurable. But the parameters are labelled illogically:
{CODE(Colors="Tiki")]
'description' => tra('Currently only shows switch to and from mobile mode.'),
'prefs' => 'mobile_feature',
'params' => [
'to_label' => 'name' => tra('To Label'),
'description' => tra('Switch to normal site label'),,
'from_label' => 'name' => tra('From Label'),
'description' => tra('Switch to mobile site label'),,
{CODE}

To switch to mobile, the 'switch to normal site' label is offered, and to switch from mobile, i.e. to normal, the 'switch to mobile' label is offered...
