Description

I have a search module which searches into the wiki pages.

On clicking "OK", I do get on tiki-listpages.php?find=mysearchword&go=OK and it displays for a short time the correct list of pages and the correct number of pages. Then the « I'm searching » spinner kicks in and the list of search result pages is replaced with the full list of all pages.

There is a demo here:

<https://showlistpages.winter.alsawiki.com>

Database available here : https://showlistpages.winter.alsawiki.com/backups/dump_db.sql.gz

Workaround

Put this line high in `tiki-listpages.php` (pity!)

```
$prefs['feature_jquery_tablesorter'] = 'n';
```

I'm having issues creating a show2 instance 😞 The database creation takes forever. More likely, it's stalled 😞

Jean-Marc Libs 21 Oct 20 01:16 GMT-0000

Fix confirmed on Tiki21.x
Issue closed

Thanks a lot!
