### Description

This is a site which is not available to the public. Therefore, if someone follows a link to a resource, they are redirected to the login page and after logging in, they get redirected to the resource they wanted to watch.

This works for resources such as web pages of calendar events (good!) but not for tracker item resources (bug!).

#### Config of show instance

The configuration is close to the default.

#### Changes are

Global permissions:

Added

Registered: tiki\_p\_view (wiki)

Registered: tiki\_p\_view\_trackers (trackers)

Registered: tiki\_p\_view\_calendar (calendar)

Registered: tiki\_p\_view\_events (calendar)

Deleted

Anonymous and all the children groups: tiki\_p\_view (wiki)

In <http://jyhem-9952-7592.show2.tikiwiki.org/tiki-admin.php?page=general>

The following change has been applied

Preference permission denied url set (Preference name: permission\_denied\_url)

How to reproduce

Now you can try logging out and accessing the following:

- Direct link towards a tracker item (fails to direct to the item after logging) :  
[http://jyhem-9952-7592.show2.tikiwiki.org/tiki-view\\_tracker\\_item.php?itemId=1](http://jyhem-9952-7592.show2.tikiwiki.org/tiki-view_tracker_item.php?itemId=1)
- Direct link towards a wiki page (works fine: on sees the file right after logging) :  
<http://jyhem-9952-7592.show2.tikiwiki.org/tiki-index.php?page=Not-home-page>
- Direct link towards a calendar item ((works fine: on sees the file right after logging) :  
[http://jyhem-9952-7592.show2.tikiwiki.org/tiki-calendar\\_edit\\_item.php?viewcalitemId=1](http://jyhem-9952-7592.show2.tikiwiki.org/tiki-calendar_edit_item.php?viewcalitemId=1)

Why does it not work for tracker item resources?

I could not find any obvious reason 😞

Solution

Well that was a chewy one! No ideal fix really but this bbdc1a70 seems to do the trick for me locally
