Related-to

- ✖ New parameter to set by default (for all new gallery) the maximum of version (archive) per file.
- ● Filegallery, Console batch upload; Displayed message about duplicate is wrong

Description

Using the batchupload command on the console it should be possible to set what to do when there is a duplicate file detected, when you upload a file with the same name than a file that is already in the file gallery.

```
--duplicatedFileReplacesPrevious
```

To replace the file with the new one and delete the previous.

```
--duplicatedFileIgnored
```

To Ignore new one if a file with the same name is already there.

It seems it should be the default, but it is not applied (tested on Tiki22, 23 and 24)

Additionally the process allow a file gallery to be created if it doesn't exist;

```
--createSubgals
```

Providing the value for "Maximum number of archives for each file" in newly created file gallery.

```
--createdSubgalMaxNumArchives=1
```
