Description

Hi,

I'm filing this as 'Bug - Consistency' because the error message does not always display.

Two scenarios - when a new user is added:

1) ... than you immediately assign them to a group, this message is displayed. However, the user is assigned to the group correctly, so to resolve this problem the only thing that needs to be done is for the Error Message not be displayed.

2) ... than the Admin User page is refreshed, no error message is displayed when assigning this new user to a group.

One other piece of information - since the new 'enter password' (e.g. Admin Password) for adding / editing users was added, a Firefox pop-up asking to 'Reconfirm submission' is regularly displayed:

Maybe this is interfering?

Thanks,
Mike
