### Description

All of the wizards use icons that are hardcoded, and this results in them being un-influenced by the choice of iconsets, so they can look out of place.

This should be switched to the way almost all other icons are used (declaration by a given name, and redirection in /themes/basefiles/iconsets).

Almost, because tiki-sheet also uses hardcoded icons (should also be switched one day).

/templates/admin/include\_score.tpl also uses hardcoded icons (fa fa-question-circle fa-fw) which should be switched to declaration as well. Also, the unique rule names are preset without translation.
