Description

Hello everyone.

I'm encountering the following issue. I found some tickets regarding this message but nothing seems to be related to this specific issue.

Is this a bug or something from my side? Any clues?

When I'm trying to access the page `/tiki-syslog.php` I'm getting this error message
Error message:

Potential cross-site request forgery (CSRF) detected. Operation blocked. Required headers are missing.

Log output:

Request to /tiki-syslog.php failed CSRF check. Requesting site could not be identified because HTTP_ORIGIN and HTTP_REFERER were empty.

Server Info

- Release: Debian GNU/Linux 10 (buster)
- Database Version: 10.3.23-MariaDB-0+deb10u1
- PHP version: 7.3.19-1

Thank you very much.
