Description

Many features aren't working correctly. There's no delay on action popup display, menu dropdowns aren't showing their usual ease-in/-out, tabs aren't working in admin pages (I turn the feature on but the checkbox is unchecked again after the page refreshes), etc. I don't know if it's a JavaScript problem or if JavaScript weirdness is a result of something else, actually.

Can't see any javascript errors (flushed the caches anyway, as i expect you did), and some things work, like the animation on the search buttons in the page top module, and the menu 42 show hide animates as expected, maybe an obscure pref been changed somewhere?

Gary Cunningham-Lee 20 Jan 21 16:47 GMT-0000

Thanks for the reply. I checked again just now in MS Edge and things are normal, but in Firefox (on Windows), there are the problems I described.
