Description

A list of "small" improvements to improve Tiki surveys;

1. The multiple-choice options length are too limited. Above 6 or 8 option is not possible.
2. The heading field is not easy to use and can be enhanced.
   1. The page option should be placed at the end (if doesn’t exist then newpage=n). Should be better to have a radio button set to "no" by default.
   2. It should be possible to use it for plain text (not only header)
   3. It should be possible use formatting tools (bold, underline, ...)
   4. It should be possible to use a link (open a _blank page)
