Description

In Tiki survey you have an question type "Heading" where you can set if it will be use as a pagebreak (newpage) and what heading type will be used.

At https://tiki.org/tiki-admin_survey_questions.php?surveyId=8 it started to work well and I had a survey divided in 3 pages. At some point it stopped to work and the all survey is displayed on one page.

I try to diagnose but could get back to the point I have the survey properly displayed in more than one page.

- I try to separate heading (avoiding one after the other)
- I try to reduce the number of pagebreak
