Description

Tiki Wiki has a fortune cookie feature. But you cannot admin it: There is no link to it...

<http://doc.tiki.org/Cookie> states

"Taglines are managed by going to Admin Home and clicking on the "Cookie" link at the bottom of the page in the table (or go to the page `tiki-admin_cookies.php`). "

On `tiki-admin.php` there is no "Cookie link at the bottom of the page"... However, `tiki-admin_cookies.php` can be manually called by modifying the URL in the browser...

Thanks

hman

Solved (partially). By chance I found that there is a link to fortune cookie management, but it is NOT where the doc text on doc.tiki.org says it would be ("at the bottom of the page"). Instead, it's at the opposite end, at the top of the page, in the drop down menu "tools". IMHO the text on doc.tiki.org should be updated.

Thanks

hman
