Related-to
    • ⊗ Tracker File Upload to Assigned Gallery and Browse Assigned Gallery Not Functioning

Description
    As of 21.x and 22.x the elFinder gallery url's have changed. This has created issues with existing
    menu items that were pointing to a file gallery. The url's used before would have a trailing /file1 for
    a gallery.
    Now using elFinder their is an extra trailing url attached that looks like this:

    /file1#elf_f1_MQ

    A show instance will be created, at the show instance you can turn elFinder on and off, and view the
    gallery url's change.

Solution
    Hopefully fixed in a8c76e82 and backported to 21.x in b0eff958

Hi John

Is this really a problem? /file1 will still work, elFinder adds the extra bit to keep track of where you are inside elFinder - the part of the url after the hash character, the URI fragment is added by the client using javascript, so you can go back to where you were if the url doesn't change, like when you change folders in elFinder.

It shouldn't prevent your existing menus from working (i thought).

John Morris 26 Feb 21 16:14 GMT-0000

Thanks Jonny, ya, it seems to matter, my menu items for galleries were pointed to file1 etc, they used to direct the user straight to that file folder, but now, it directs the user to the overall file structure of elFinder.
If you have a minute, please see my live site at https://thepatriotwoodwiki.org/HomePage

At the left column menu items, for example click on "Education" then "File Galleries". You'll be taken to the overall elFinder file structure instead of the "Education" gallery. You'll note that the heading of the gallery page may say "Education", but you are not inside the "Education" file gallery.
If we turn off elFinder, it works, turn elFinder on, it does not work.
I have attached a screen shot of a few of my menu items as I have them configured. Thanks for any help Jonny.

I still standby this issue, it's a problem, especially if you are trying to browse gallery for tracker items. The typical /file1 does not work, as stated, you are taken to overall gallery, not the specific file gallery. 😬

John Morris 22 Apr 21 00:16 GMT-0000

I just updated the show instance, you will see a menu at left side, I tried file4 for gallery link and that is not working anymore either, hmmm. How do you link to a specific gallery anymore? Thanks

John Morris 05 Jun 21 02:29 GMT-0000

Just refreshing this subject, any help is greatly appreciated. 😬

Jonny Bradley 06 Jun 21 09:56 GMT-0000

Sorry it's taken so long to get to this one, i've been noticing it a lot recently and had a go yesterday but it's not a simple fix... hoping to nail it before 23.x branches (soon in fact, and will backport it to 22.x and 21.x)

John Morris 07 Jun 21 19:26 GMT-0000

Thank you completely Jonny!

John Morris 24 Aug 21 11:36 GMT-0000

Hey Jonny, do we know how this changed, why it happened, why it stopped working? Thanks

John Morris 05 Oct 21 20:07 GMT-0000

Just keeping this alive. 😄

John Morris 05 Oct 21 20:07 GMT-0000

Just keeping this alive. 😃

Jonny Bradley 11 Oct 21 15:39 GMT-0000

Hi **@John Morris**
Sorry this took several years to get done 🙄 the fix is now in all branches down to 21.x so i hope you can test it somewhere? It's only one file which maybe you can get from here (for the 21.x version):

- 21.x/lib/jquery_tiki/elfinder/tiki-elfinder.js

Oh, and please note it only works so far only on normal file galleries, it still goes wrong on user or wiki attachment galleries i'm afraid.

John Morris 13 Oct 21 11:30 GMT-0000

Thank you Jonny! I'll give it a run and report back!

John Morris 14 Oct 21 11:11 GMT-0000

Works as advertised! Thanks Sir Jonny!!!!!

Jonny Bradley 15 Oct 21 10:59 GMT-0000

Thanks **@John Morris**, sorry it took so long!

John Morris 27 Dec 21 02:38 GMT-0000

Jonny, I loaded up an instance of 23.x and found that this fix was not in 23.x
Just a heads up. 😃

Jonny Bradley 28 Dec 21 15:44 GMT-0000

Hi **@John Morris**

That's odd, i did cherry-pick it to 23.x at the time in c8e1e73e - seems to work on my 23.x here, maybe something else is up?

Hmm, so however this one doesn't work, will try and re-investigate one day...

John Morris 28 Dec 21 16:09 GMT-0000

Jonny, I went ahead and uploaded the patch to my v23.x and it worked after that, but with a clean install, it did not function.

John Morris 19 Nov 22 14:18 GMT-0000

Issue is resolved
