This has been on the informal to-do list, or at least it has been mentioned from time to time. The idea I recall being mentioned is that the pref options should be in the module admin and removed from Look and Feel admin.

Also, some of the logo preference options are vintage era, like specifying a background color behind the logo, and I imagine the layout code maybe could use some modernizing, too.

Fixed in Tiki25

Actually it isn't completely fixed. It's still necessary to go to L&F admin to turn on "site logo and title" (IIRC) before the logo module is available to be assigned on the admin modules page. That should be a separate wish.

You are right, thank you Gary;
