Related-to

- Umbrella bug report for new missing tra() bugs

Description

If you take a close look at a long bug report like my "umbrella bug report", you'll see that it bears so many comments, their display gets paginated. That's a good idea. But one would expect that the first comment on page "2" is one following the last on page "1".

But that isn't the case... The last on page 1 is dated August 31st, the first on page 2 is from August 22, 2020...

And yes, I did reload the page to be sure that I do not see old data...

Thanks

hman

I counted the overlap: the first 20 (!) entries (plus sub-entries) on page 2 are a repetition from page 1...

hman 10 Jun 21 21:34 GMT-0000

It's much worse on page 3: About 88 entries on page 3 are a repetition from page 2... plus sub-entries...

hman 11 Jun 21 08:13 GMT-0000

Just have a look where I have to place the vertical scroll bar, so that I see the first content on page 3 that is no longer just a repetition from page 2. Stunning... Note: The browser window (Firefox on Linux) is about 900 pixels vertical at the moment.
