Comments

Jonny Bradley 08 Jun 21 10:14 GMT-0000

That's an image gallery file (deprecated since tiki 3? ;)

Jonny Bradley 08 Jun 21 10:19 GMT-0000

I checked and Image Galleries didn't seem to be enabled, so in case they had been migrated i enabled `file_galleries_redirect_from_image_gallery` but it still didn't show up...

Jonny Bradley 08 Jun 21 11:32 GMT-0000

Nope, seems like someone disabled image galleries without migrating, so i re-enabled it temporarily (will be good dog-food ;)

hman 08 Jun 21 21:25 GMT-0000

Remember that migrating doesn't work, it just copies the files, after that, calling them by the old reference yields a "file not found"...

Jonny Bradley 09 Jun 21 07:54 GMT-0000

That's not correct, the old image gallery id's continue to work if you enable `file_galleries_redirect_from_image_gallery` (it's just in this case the migration script

wasn't run and the old galleries were just disabled)

hman>Jonny Bradley 09 Jun 21 13:52 GMT-0000

Replied to That's not...

It is, that is why I opened a bug report for that... I migrated a small set of image gallery files, and this created a new folder "migrated image galleries", but all calls to images that were migrated failed after the file gallery feature was turned off.

Also, where is "file\_galleries\_redirect\_from\_image\_gallery" ? The search function doesn't find it, also a grep through the entirety of Tiki 18.8. doesn't find that string. Was that a feature introduced after 18.8?

hman>hman 10 Jun 21 05:18 GMT-0000

Replied to

It is,... I found it. It is visibly named "Redirect to file gallery" and located in /lib/prefs/file.php. Strange. Inside it is indeed named "file\_galleries\_redirect\_from\_image\_gallery", but grep did not find it. Anyway, it's turned on, and still, calls to migrated files yield a 'file not found'.

Jonny Bradley>hman 10 Jun 21 09:37 GMT-0000

Replied to I found it....

The normal search on tiki-admin.php found it fine for me, but i agree the label on that pref is less than helpful (wasn't me ;) - not sure if it was in 18.x though.

I added some better output to the migrate command here [ffb463d3](#) so hopefully that will help in the future.

hman>Jonny Bradley 10 Jun 21 10:15 GMT-0000

Replied to

The... Thanks. But besides better output, the function itself needs to be fixed...

hman>hman 10 Jun 21 12:30 GMT-0000

Replied to Thanks. But... A remark, if you pardon me making it as a non-native speaker: I

believe in "Something went wrong so, please check" the comma is at the wrong position...  
Also, IMHO you should not use hard line breaks inside strings...
