- ● Wiki page; Deleting a page from tiki-listpages with the actions wrench menu requires a refresh to see the page deleted

Description

I tested deleting user and users.

If I delete a group of users using the checkboxes and the delete dropdown at the bottom I see the confirmation dialog but it doesn't seems to work.

I need to refresh the page to see they were deleted and ONLY THEN I see the success message:

Success

The following users have been deleted:

test3gmail.com, test4gmail.com

If I delete one by one users using the action wrench "X delete" it does the same, as long as I don't refresh no Success message and they still appears on the list.
