Description
In the wiki syntax the following code

Status on ((TikiFest Virtual 2021 Summer Workshops)) - May shift to longer second hour topic
[https://tiki.org/forumthread77173-Translation-for-tiki-site-close-page-tiki-error_simple-php|Tiki simple-error (site closed)] translation dilemma When closing a Tiki website we gave the option for the admin to edit the message. It sound like a good thing BUT on the other hand translation of the rest of the page may be impossible and if the admin of a french Tiki insert a french message the final screen for the end-user will look badly done. (half english and half french) * Is it important to solve this * Is it possible to avoid english/hardcoded strings (so the Admin wrote everything he want) * ... # Is there a delay between what we see at Gitlab and the reality see: https://tiki.org/forumthread77159-How-reliable-is-gitlab-informations

Will produce this (the not expected result):

1. Status on TikiFest Virtual 2021 Summer Workshops - May shift to longer second hour topic
2. Tiki simple-error (site closed) translation dilemma

When closing a Tiki website we gave the option for the admin to edit the message. It sound like a good thing BUT on the other hand translation of the rest of the page may be impossible and if the

admin of a french Tiki insert a french message the final screen for the end-user will look badly done. (half english and half french)

- Is it important to solve this
- Is it possible to avoid english/hardcoded strings (so the Admin wrote everything he want)
- ...

1. Is there a delay between what we see at Gitlab and the reality see: https://tiki.org/forumthread77159-How-reliable-is-gitlab-informations

This is bad as it is breaking the page format and the heading numbering system.
To prevent this I have to add indent for each block between a line feed (+) and so this code:

```
# Status on ((TikiFest Virtual 2021 Summer Workshops)) - May shift to longer second hour topic
# [https://tiki.org/forumthread77173-Translation-for-tiki-site-close-page-tiki-error_simple-php|Tiki simple-error (site closed)] translation dilemma +When closing a Tiki website we gave the option for the admin to edit the message. It sound like a good thing BUT on the other hand translation of the rest of the page may be impossible and if the admin of a french Tiki insert a french message the final screen for the end-user will look badly done. (half english and half french) +* Is it important to solve this +* Is it possible to avoid english/hardcoded strings (so the Admin wrote everything he want) +* ... # Is there a delay between what we see at Gitlab and the reality see: https://tiki.org/forumthread77159-How-reliable-is-gitlab-informations
```

Will produce this (the wanted result):

1. Status on TikiFest Virtual 2021 Summer Workshops - May shift to longer second hour topic
2. Tiki simple-error (site closed) translation dilemma
   When closing a Tiki website we gave the option for the admin to edit the message. It sound like a good thing BUT on the other hand translation of the rest of the page may be impossible and if the admin of a french Tiki insert a french message the final screen for the end-user will look badly done. (half english and half french)
   * Is it important to solve this
   * Is it possible to avoid english/hardcoded strings (so the Admin wrote everything he want)
   * ...
3. Is there a delay between what we see at Gitlab and the reality see: https://tiki.org/forumthread77159-How-reliable-is-gitlab-informations

That is pretty dumb in 2021 and as long as I'm between 2 heading Tiki should understand it has to indent the text accordingly.

Importance
      10 high

Easy to solve?
      7

Priority
      70
