Description

clicking on svn update for a show2.t.o instance from a bug tracker in dev.t.o does apparently nothing

Reproduced with the show2.t.o instance linked to this bug report:

<https://dev.tiki.org/item7332-Slides-in-21-x-Section-about-wiki-page-comments-wrongly-placed-on-to-p-of-all-slide-titles>

-

I've been unable to svn update show2.t.o sites (20.x, 21.x...) through the button in the show2.t.o related field in dev.t.o/tracker5

Same with "destroy instance" which didn't work and no info was provided to the end user. I had to destroy them by hand at the show2.t.o server.

I think it does work but doesn't tell you every time - the code in there is pretty poor... 😞
