Parsing of special character wiki syntax in PluginHTML seems broken | Tiki Wiki CMS Groupware :: Development
Parsing of special character wiki syntax in PluginHTML seems broken

Status

✖ Closed

Subject

Parsing of special character wiki syntax in PluginHTML seems broken

Version

23.x

Category

- Regression

Feature

Wiki Plugin (extends basic syntax)

Wiki Syntax (text area, parser, external wiki, etc)

Resolution status

Fixed or Solved

Submitted by

Gary Cunningham-Lee

Rating

★★★★★ (0) ?

Description

When the parameter for wiki parsing is used in PluginHTML, some syntax produces the expected results (I didn't test a lot), but syntax for special characters displays as syntax, not as the special character. See https://doc.tiki.org/PluginHTML?latest=1&no_bl=y#Example_4.
