Description

On Tiki23 I set a CUSTOMSEARCH plugin to display a list of tracker items in a table output template with some actions buttons for each rows.

```
{DIV(type="span" class="click-modal")}[tiki-tracker-update_item?trackerId=22&itemId={display name="object_id"}&modal=1|{icon name="edit" iclass="text-warning mx-2 click-modal"}]{DIV}
```

It work just fine.

But if I try the same on a List or ListExecute plugin, the "&" in the url are changed to "&" which is breaking the link. You have to add for the column "mode=raw".

Would be nice to have the (same) behaviour like in the CustomSearch plugin (no change)

Complete plugin code to reproduce.

```
{LISTEXECUTE()}
  {filter field="tracker_id" content="22"}
  {filter field="tracker_status" content="o OR p"}
{OUTPUT(template="table")}
  {column label="Date" translattelabel="y" field="date" mode="raw"}
  {column label="Name" field="name" translattelabel="y" mode="raw"}
  {column label="Month" field="month" translattelabel="y"}
  {column label="" field="action"}
{OUTPUT}
{FORMAT(name="date")}{display name="tracker_field_productsboughtDate"
format="date"}{FORMAT}
{FORMAT(name="name")}{display name="tracker_field_productsboughtCustomer"
format="objectlink"}{FORMAT}
{FORMAT(name="month")}{display name="tracker_field_productsboughtMonthOrder"}{FORMAT}
{FORMAT(name="action")}{DIV(type="span" class="click-modal small")}[tiki-tracker-
update_item?trackerId=22&itemId={display name="object_id"}&modal=1]|{icon name="edit"
iclass="text-primary mx-2 click-modal"}]{DIV} {DIV(type="span" class="click-modal
small")}[tiki-tracker-insert_item?trackerId=11&modal=1]|{icon name="cash-register"
iclass="text-success mx-2 click-modal"}]{DIV}{FORMAT}
  {ACTION(name="Close")}
    {step action="change_status" from="p" to="c"}
  {ACTION}
{LISTEXECUTE}
```

Another example is the fact that most of the time the expected value for "field" if it is to be filled with a tracker field parameter must start with "tracker_field" but not for the plugin ListExecute modify-item parameters. This add confusion to people new to the plugin ListExecute.

```
Not accepted)) {step action=
```

```
{step action="tracker_item_modify" field="paymentsStage" method="add"}
```

Have you tried:

```
{column label="" field="action" mode="raw"}
```

instead of

```
{column label="" field="action" }
```

?

Bernard Sfez / Tiki Specialist 05 Oct 21 12:06 GMT-0000

As Jonny suggested on Git a little earlier, I re-tested using mode=raw solve the issue on Tiki23 (can't say about the original Tiki21 and Tiki22 I tested as it will take me too long to recreate conditions).

This said, why customSearch work one way and List and plugin List differently here ? All should work the same.

Bernard Sfez / Tiki Specialist 09 Oct 21 20:53 GMT-0000

Cleaned and re-assigned the ticket.
