### Related-to

- ❌ tiki-admin\_survey\_questions.php could need some better interface - especially for multiple choice

### Description

The survey interface has been left behind and should be upgraded to bootstrap 4 standards.

Hi Bernard. Thank you for the request.

A junior developer would be in charge of resolving this.

Marc Laporte 10 Oct 21 03:23 GMT-0000

@**Bernard Sfez / Tiki Specialist** Are you saying that Bootstrap 4 classes were not assigned when we did it for the rest of Tiki? Or that they were assigned but overall, surveys look old?

Both valid tasks but it's not the same skill set to address.

Bernard Sfez / Tiki Specialist 10 Oct 21 06:36 GMT-0000

Both and/or partially.

It seems some parts has bootstrap class but from what I see this is not complete (or optimised) there are many additional classes and it doesn't look good.

My doesn't look good definition:

- Question and options look like one long list
- Questions sections are not separated (need space)
- Some options take a lot of space while text is short (optimisation) (mobile)
- Some option are too hard to understand for non techies (radio button 1 to 5) so we add more text to explain what should be obvious
- We could "hide" the radio button or style it nicely as well as other check (a real check icon or stars ?)
- Style is stiff (barebone) and look web1.0 I copied some sample links but there are many to

compare with.

PS: We have an option to have a multipage Survey (something very good for big surveys or to create a test/training survey) but I couldn't have it to work.

It started well and at some point... pouf (multipage was gone).

Gary Cunningham-Lee 10 Oct 21 08:03 GMT-0000

The screenshot shows a combination of Bootstrap classes and places where they should probably be used but aren't.

Maybe this is obvious, but just stating for clarity: the layout should be checked for legacy HTML and CSS that can be replaced with Bootstrap methods and CSS classes. The goal is to use Bootstrap HTML/CSS as much as possible and replace old one-off pre-Bootstrap constructions and CSS. Also, we'll be upgrading to Bootstrap 5 pretty soon, so it might be good to look ahead and make changes that will be supported by Bootstrap 5, if possible. Anyway it would be good to not replace what's there with code that will need to be replaced again shortly, but actually even replacing unique legacy stuff with standard Bootstrap 4 stuff will definitely make the upgrading it easier.
