Description

Structure Menu does not update after page-name changes

1. you have a page in a structure and the structure Menu is activated
2. you change the page name
3. in the breadcrumb navigation the changed page name shows up
4. but in the Structure menu the old name did not change, but when clicking on it the page shows up anyway.
5. in the Structure page the correct name is shown anyway

e.g. changed page ITSystemFiltered to ITSystemActiveFiltered

## Solution

Rebuild structure menu after page rename

## Workaround

Remove the page from the structure (without deleting the page of course) and add it into the structure again.
