Description

At <https://doc.tiki.org/tiki-index.php?page=Social%20Networks> currently (Tiki 23), the first slide of the (reveal.js) slideshow appears but clicks on the "next" icon don't display the next slide. The "List slides" menu item shows the slide thumbnails, but clicking on any of them only causes the first slide to appear. I've tried at several sites running Tiki 23 and current trunk with the same results.

As per Tiki23 the slide is working (for me) on several Tiki.
I don't see a slideshow at the page you indicate to see the issue.

Please retest and add more information on the bug and how to reproduce or see the issue.
