

i have created three items in TestTracker1, two of them linked to TestTracker2, one item not linked.

but if i filter for that not-linked item-link field, it just did not show up in TrackerList / TrackerFilter.

here's the code

by the way, in PluginList this problem does NOT occur, here the correct output is displayed.

and the code of the PluginList

Workaround

do not use PluginTrackerFilter or PluginTrackerList, instead use PluginList.
