### Related-to

- TrackerList & TrackerFilter filtering for empty/not-set item-link fields broken

### Description

Using trackerList or TrackerFilter and filtering for a non-linked item-link field, not only there is no result displayed (filtering broken), but also the Plugin GUI is not working. When clicking on the "Edit Plugin" icon only a message "javascript:void()" is displayed in the browser, but nothing else happens, no Plugin GUI is shown.

As soon as i remove the problematic filter in the Plugin source code and save the page, the "Edit Plugin" GUI is working again like expected.

### Solution

Noz able to reproduce the problem every time. Unclear if it is really a subsequent problem or caused otherwise. Will maybe open up the ticket again if i have more info.

### Workaround

Use PluginList instead or remove the filter for empty item-link field.
