Description

Since Tiki21 I use tabular import through the console to daily import and update items.
It went through with Tiki22 and worked fine for several month then a few month before Tiki23 it started to throw errors.

I updated to Tiki23 to check and it is the same.

It is interesting to note that the tabular import from the HTML front end doesn't throw any error and that in the end both import successfully all the items.

This is the error I have for the 13 items that are imported

```
xxx:~/public_html$ php7.4 console.php tracker:import 20 ../biens/biens_avendre_24_10_2021.csv
Importing tracker... Array to string conversion on line 141 of
/home/elyseavenue/public_html/lib/core/Tracker/Tabular/Writer/TrackerWriter.php Array to
string conversion on line 141 of
/home/elyseavenue/public_html/lib/core/Tracker/Tabular/Writer/TrackerWriter.php Undefined
index: status on line 2113 of /home/elyseavenue/public_html/lib/trackers/trackerlib.php ...
<feedback>feedback: 13 tracker(s) item(s) updated </feedback>
```
