Description

Since Tiki21 I use batchupload through the console to daily import files.

It went through with Tiki22 and worked fine for several month then lately started to throw warnings.

I updated to Tiki23 to check and eventually solve as Tiki22 is nearly end of life.

There is one error per file, for ALL the file I import.

The duplicate is a kind of normal (there are duplicates) and doesn't affect all the files (work as expected).

```
~/public_html$ php7.4 console.php files:batchupload 5 --subdirToSubgal --createSubgals --
confirm Undefined variable: useCache on line 1328 of
